2.6.2 - Attainment of Programme Outcomes and Course Outcomes as evaluated by the institution

1. Course outcomes focus on specific skills and knowledge students should acquire after completing a particular course.
2. Program outcomes represent broader abilities and competencies that students develop throughout an academic program.
3. The alignment of COs and POs ensures that each course contributes meaningfully to the overall objectives of the program.
4. Measuring CO attainment involves assessing student performance in assignments, exams, and practical applications related to course-specific objectives.
5. Program outcomes are evaluated using cumulative data from multiple courses, projects, internships, and extracurricular activities.
6. Continuous feedback from students, faculty, and industry stakeholders helps refine COs and POs to match evolving academic and professional standards.
7. Through a well-structured curriculum, robust teaching methodologies, and consistent assessment strategies the College works toward achieving effective attainment of POs and COs.
